About Me

Passionate Data with a strong foundation in Python & Excel. With a background in Sharia Economic Law and hands-on experience in BI, machine learning projects, and media monitoring, I specialize in analyzing and validating online news sentiment, structuring large datasets, and transforming them into clear daily, weekly, and monthly reports. Skilled in building data pipelines, sentiment analysis models, and automated topic clustering, I am eager to leverage my analytical mindset to support data-driven media insights and business decisions.

Education

Universitas Islam Bandung (September 2017 – Juli 2022)

S1 Sharia Economic Law

Experience

Media Analyst at PT Kurasi Media Nusantara (October 2025 – Present)

- Analyze daily batches of online news articles to identify context, sentiment, and emerging issues.
- Validate sentiment classifications and topic categorizations to ensure high data accuracy for internal and client-facing reports.
- Prepare comprehensive daily, weekly, and monthly media reports, highlighting key trends, issue developments, and actionable insights.
- Support data quality control processes to ensure the reliability of insights used by analysts and stakeholders.

Jr. Data Engineer at No Limit (Februari 2025 – Mei 2025)

- Developed a Twitter token monitoring system using Python and Scala
- Build backend services to connect Database with OCR API

Jr. Data Science at No Limit (November 2024 – Februari 2025)

- Trained sentiment analysis models on project datasets.
- Developed and fine-tuned model to achieve >90% prediction accuracy
- Build automated topic clustering for daily news reports

Data Validator at No Limit (April 2024 - November 2024)

- Validated social media sentiment
- Validated up to 100,000 data weekly for Machine Learning development and team analyst

Training, Courses and Certifications

- **My Skill (April – Mei 2023)**

- Data Analysis: Full Stack Intensive Bootcamp**

- Introduction to Data Analysis, Basic Statistic, Data Formatting, Data Cleansing, SQL, Python, Data Visualization.*

Skills

- Programming: Python, SQL
- Tools: Microsoft Office (Excel, Word, Powerpoint), Google Sheets, Power BI
